

## Quality Policy Statement

Consulmet (Pty) Limited is an infrastructure company covering process engineering projects, process operations, electrical infrastructure projects, civil and building projects within the African continent. We undertake all aspects of infrastructure projects from engineering design, bulk excavations, site preparation, road construction and construction of other concrete works for water reticulation and drainage systems.

Consulmet (Pty) Limited ensures that this quality policy statement and supporting procedures apply to all works and activities undertaken by the company. The company's success is based on achieving excellence in all business activities and is further supported by its ability to consistently meet customer, regulatory and other statutory requirements through continuous improvements in our integrated safety, health, environment and quality management systems.

Consulmet (Pty) Limited endeavours to co-operate and work as a committed team member with all our stakeholders to ensure our Client's standards and requirements are adhered to. Our project quality plans include all the requisite control measures to ensure all activities meet our Client's requirements.

As such, the management team at Consulmet (Pty) Limited takes responsibility for setting quality objectives and targets for all activities to enable continuous development and performance of the company's operations, equipment and facilities by:

- Establishing management systems that comply with ISO 9001, ISO 14001 and OHSAS 18001 to minimise risks
- Complying with all relevant South African Safety, Health and Environmental laws and standards that relate to safety hazards, the allocation of appropriate resources and the provision of training, education, consultation and auditing.
- Providing open avenues for effective community liaison to reduce the Safety, Healthy, Environment and Quality risks associated with the activities of Consulmet (Pty) Limited and to encourage all employees, contractors, suppliers and other stakeholders to encourage a quality orientated culture that reflects the intent of this policy.
- Ensure clear definition of authority, responsibilities and interfaces as documented in the quality procedures
- Develop mechanisms to identify, isolate and control non-conformance in all works and activities
- Promote a culture focused on efficiency and cost effectiveness in execution of all works
